

Is YOUR School a STEM School of Excellence?

STEM is an important force in our economy; anyone and everyone benefits by being familiar with it. Teaching all students to know and do STEM is best delivered when engaging them through technology and engineering and connecting it to science and math.

ITEEA has long been a leader in providing Integrative STEM Education resources to lead our profession and enable all educators to take the initiative in how I-STEM Education is defined and delivered in our school systems.

This leadership is further supported and demonstrated by the schools across our nation and around the world that are effectively bringing critical STEM skills to today's students.

ITEEA's STEM Center for Teaching and Learning™ recognizes outstanding schools for their commitment to providing a robust Integrative STEM education program. Schools recognized exemplify outstanding leadership in the field of STEM education and undergo a rigorous application process requiring detailed documentation to demonstrate a strong Integrative STEM program. A panel of reviewers will reach consensus that the documented evidence represents excellence in Integrative STEM education.

ITEEA created the designation as a way to officially recognize those schools whose teachers, administrators, and other stakeholders are providing a meaningful STEM education experience for students. By highlighting these schools, ITEEA hopes to help others learn effective best practices and continue sharing them more broadly into the larger STEM-Education community.

STEM Schools of Excellence will be honored at the 2021 ITEEA Annual Conference in Denver and receive a banner and certificate to display in the school. Apply to be an ITEEA STEM School of Excellence today!

2020-2021
